

The Extraordinary Investment Club

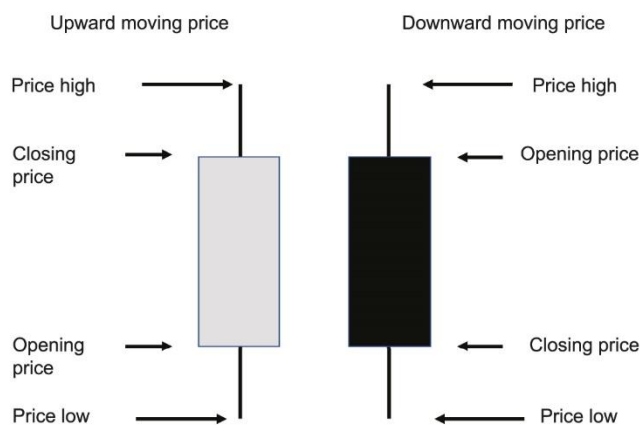

Written & read by Jeff Fitzpatrick

Published by ReThink Press

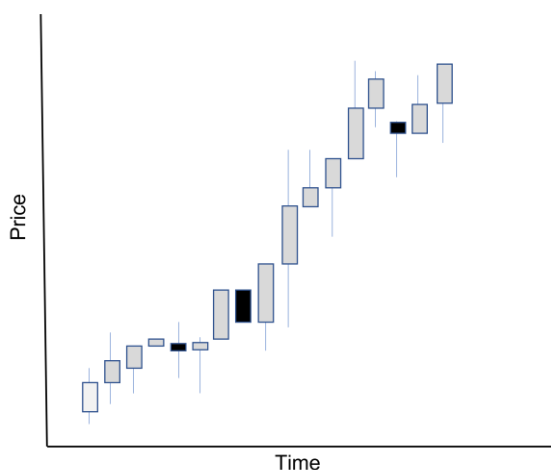

The Extraordinary Investment Club is an account of the trading techniques and operations of a UK based group of investment clubs that have achieved extraordinary, sustained success in the US stock markets through good times and bad. The members are everyday people some of whom invest as little as £100 per month while others have invested many tens of thousands of pounds. This

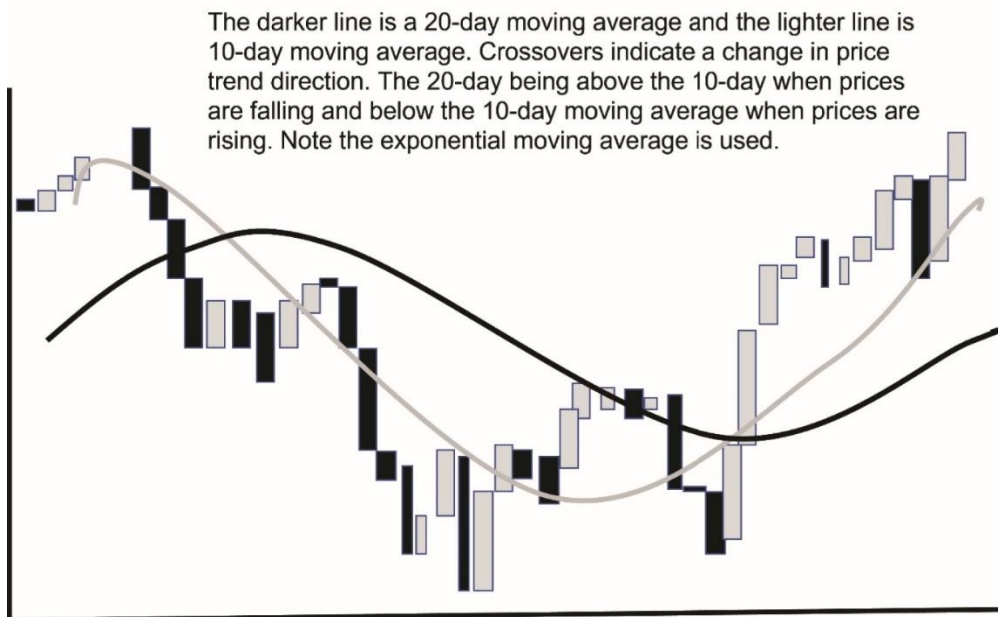

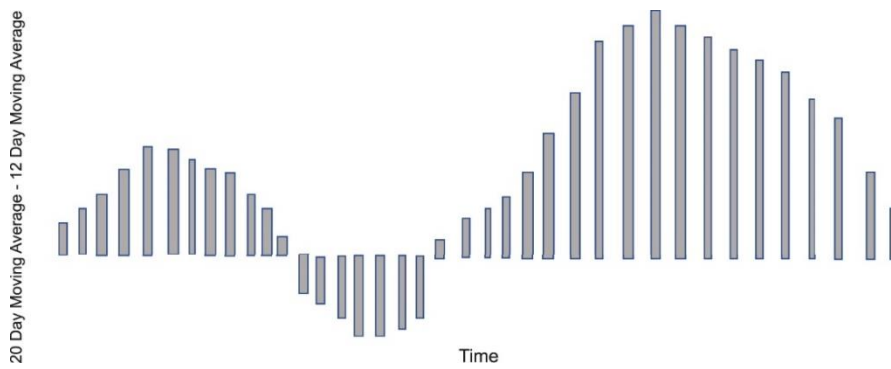

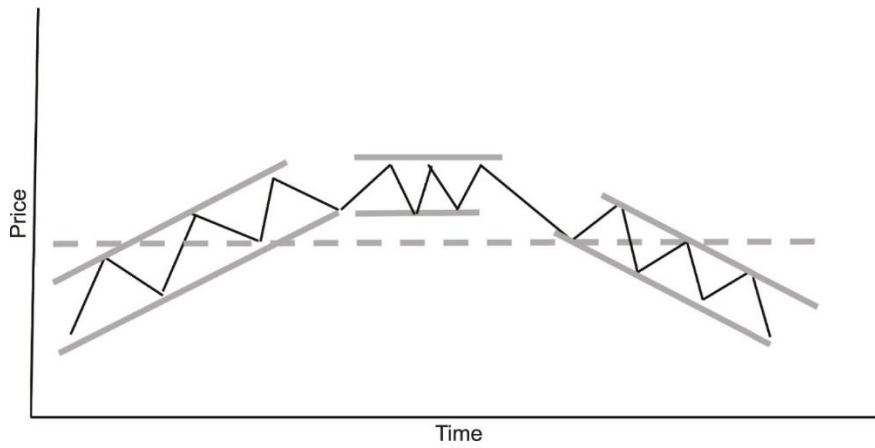

document is primarily intended to accompany the audio version of the book by presenting the images and tables referred to in the recording.
